The Real Numbers: Pricing, Process & Service

Pricing matrix

Item	Price	Inclusions	Exclusions
------	-------	------------	------------

Wellness Kitchen	₹8,400–10,800/sq.ft.	SilverStone cabinets, shutters, shelves, hardware, fabrication, transport, installation	Accessories, appliances, premium upgrades
------------------	----------------------	---	---

Wellness Wardrobe	₹7,320/sq.ft.	Same as above	Same as above
-------------------	---------------	---------------	---------------

10×10 Kitchen	₹12–15 lakhs	Full kitchen build	Accessories, appliances, GST
---------------	--------------	--------------------	------------------------------

25 Annual Services	Complimentary	Deep cleaning, sanitisation, alignment check	
--------------------	---------------	--	--

Stone Guarantee	25 years	Termites, water, discoloration, swelling, warping	Accidental damage
-----------------	----------	---	-------------------

Hardware Guarantee	10 years	Rust, defect, malfunction	Accidental damage
--------------------	----------	---------------------------	-------------------

Lighting Guarantee	2 years	Defect, failure	Accidental damage
--------------------	---------	-----------------	-------------------

Payment terms: 50% advance, 40% before dispatch, 10% after installation.

Process timeline: 3–4 months from final order to installation, depending on site conditions and design complexity.

□ **Note on EMI/payment plans**

The source document marks this as unresolved — "Check with finance team for current EMI partners." Do not present EMI details as settled fact. This is excluded from the quiz for that reason.

PART 2 · VERBATIM SOURCE MATERIAL (21 SECTIONS)

The sections of the master training document this module is built from — word for word, for reference and revision.

§5.B Q24 — How expensive is Magppie compared to wood kitchens?

We don't compare ourselves with the unorganised carpentry industry. Compared to branded modular kitchens, Magppie kitchens are commercially at par, but the materials are completely different. Compressed wood typically costs below Rs. 100 per sq. ft., while SilverStone costs around Rs. 500 per sq. ft. Magppie Wellness Kitchens are free from termites, bacteria, fungus, and mould, making them a healthier and more durable long-term solution.

§5.B Q25 — What is the exact pricing?

VERBATIM SCRIPT — use this exact wording

Kitchens range from Rs. 8,400 to Rs. 10,800 per sq. ft. Wardrobes start at Rs. 7,320 per sq. ft. This is based on the finish you choose. A 10x10 kitchen would typically cost between Rs. 12 to Rs. 15 lakhs. Pricing includes SilverStone cabinets and shutters, internal shelves, soft-close hardware, factory fabrication, transportation, and installation. Accessories, appliances, and premium hardware upgrades are quoted separately. We follow a fixed price policy with complete transparency — no discounts, no hidden charges.

§5.B Q26 — How do you calculate cost — per running foot or per sq. ft.? Is depth included?

We calculate per square foot of built-up area. Yes, depth is included because storage depth, internal structure, and shutter thickness all impact material usage and cost. This gives transparent and accurate pricing, unlike running-feet estimates which hide variations.

§5.B Q27 — Why is your product more expensive than wood?

The materials are fundamentally different. SilverStone is a premium, toxin-free material infused with Silver and Copper ions. It is stain-proof, scratch-proof, and harder than granite. Compressed wood contains toxins and is prone to termites, fungus, bacteria, and cockroaches. While wood costs under Rs. 100 per sq. ft., SilverStone costs about Rs. 500 per sq. ft. Additionally, SilverStone processing uses advanced water-jet machinery, which is capital-intensive and time-consuming. Despite this, our kitchens are priced similar to branded wooden kitchens.

§5.B Q28 — What is included in the cost?

Our pricing is largely all-inclusive. It typically includes: SilverStone cabinets and shutters, internal shelves and partitions, soft-close hardware and accessories, factory fabrication, transportation, and installation. Any upgrades (appliances, accessories, premium hardware) are clearly specified separately.

§5.B Q29 — What is in the customer's scope?

Customer scope usually includes: electrical points as per final drawings, plumbing connections, civil changes (if any), and appliances. We share a clear scope matrix before order confirmation — no last-minute surprises.

§5.B Q30 — Do you offer EMI or payment plans?

VERBATIM SCRIPT — use this exact wording

[Check with finance team for current EMI partners. Standard response:] We can discuss flexible payment options with our wellness consultant during the design phase. Typically, the schedule is 50%

advance, 40% before dispatch, 10% after installation.

§5.D Q38 — How long does the process take?

The complete process — from final order to installation — takes around 3 to 4 months, depending on site conditions and design complexity. Fast-track options may be available.

§5.D Q39 — How is the kitchen assembled on site?

Our kitchens are factory-engineered and assembled using precision CNC machines. The SilverStone panels are pre-cut and edge-finished before reaching the site. At installation, they are technically fixed using specialised hardware, not just adhesives, ensuring strength, alignment, and long-term stability.

§5.D Q40 — Do you do site visits?

Yes, site visits are important and we do them after the design discussion and commercial alignment. We also offer video consultations for initial discussions.

§5.D Q41 — Can we see a sample before deciding?

Yes, absolutely. We can arrange a sample delivery to your home or office, or you can visit one of our experience centres.

§5.D Q42 — What happens after I share my layout?

We prepare a customised proposal and estimate based on your drawings. Once you review and approve the budget alignment, our sales team creates detailed technical drawings. After your confirmation, the order goes into production.

§5.D Q43 — Do you work with interior designers?

Yes, we regularly collaborate with architects and interior designers. We share technical drawings, 3D renders, and coordinate seamlessly with your existing team.

§5.E Q44 — What is covered under the guarantee?

VERBATIM SCRIPT — use this exact wording

25 years guarantee on SilverStone cabinetry and countertops. 10 years guarantee on hardware and accessories. 2 years guarantee on lighting.

§5.E Q45 — What does the 25-year guarantee cover exactly?

VERBATIM SCRIPT — use this exact wording

The 25-year unconditional guarantee covers termites, water damage, discoloration, swelling, warping, and manufacturing defects on the stone.

§5.E Q46 — What are the 25 complimentary annual services?

VERBATIM SCRIPT — use this exact wording

You receive 25 complimentary annual services — one every year — which includes: deep cleaning, sanitisation, alignment and performance check. Your kitchen remains fresh, safe, and perfectly aligned for decades.

§5.E Q47 — If hardware develops rust, will you replace it?

Yes, we will replace it. The replacement will be complimentary within the warranty period.

§5.E Q48 — Will replacement be chargeable or covered under warranty?

Replacements due to manufacturing or ageing defects are covered under warranty. Accidental damage

is chargeable.

§5.E Q49 — Do I have to rely on you for after-sales service forever?

Actually, one of the biggest advantages is minimal dependency. SilverStone kitchens are termite-proof, waterproof, bacteria and fungus resistant, and warp-resistant. This means very minimal after-sales service, unlike wood-based kitchens that often need repairs, replacements, or pest treatment over time.

§5.E Q50 — How will you provide service in remote areas?

Our kitchens are engineered for low service dependency. Still, for support: installation partners are trained and certified, most issues can be resolved via guided local support, and critical components are standardised and replaceable. Because the material itself is stable, remote locations do not become a service risk.

§8 — Unified Pricing Matrix

VERBATIM SCRIPT — use this exact wording

Wellness Kitchen: Rs. 8,400 – 10,800 / sq.ft. Inclusions: SilverStone cabinets, shutters, shelves, hardware, fabrication, transport, installation. Exclusions: Accessories, appliances, premium upgrades. Wellness Wardrobe: Rs. 7,320 / sq.ft. — same inclusions/exclusions as above. 10x10 Kitchen: Rs. 12 – 15 lakhs for a full kitchen build; excludes accessories, appliances, GST. 25 Annual Services: Complimentary — deep cleaning, sanitisation, alignment check. Stone Guarantee: 25 years, unconditional — covers termites, water, discoloration, swelling, warping; excludes accidental damage. Hardware Guarantee: 10 years — covers rust, defect, malfunction; excludes accidental damage. Lighting Guarantee: 2 years — covers defect, failure; excludes accidental damage. Payment Terms (Standard): 50% Advance, 40% Before dispatch, 10% After installation.

PART 3 · VIDEO NARRATION SCRIPT (ENGLISH)

The narration for this module's video — readable now, listenable once the video is produced.

Let's talk about the numbers directly, because vague pricing erodes trust faster than a high number ever will.

Wellness Kitchens run 8,400 to 10,800 rupees per square foot, depending on finish. Wardrobes start at 7,320 per square foot. A typical 10 by 10 kitchen lands between 12 and 15 lakhs.

Payment terms: 50% advance, 40% before dispatch, 10% after installation. The process, from final order to installation, typically takes 3 to 4 months.

One flag: EMI and payment plan options are still being finalized with the finance team. Don't present that as settled — if a customer asks, tell them you'll check and follow up.
