

Module 3

Proof, Not Promises: The 7 Safety Pillars

The seven safety pillars, always presented in order, with their proof points.

Competency: Product Knowledge

Reading pack contents: module reading · verbatim source material · narration script

Source: Magppie_AI_Bot_Master_Training_Document.pdf (v1.0). All content reproduced verbatim from the reviewed training material — nothing paraphrased or generated.

Proof, Not Promises: The 7 Safety Pillars

Always present in this order:

1. Stain Safe — non-porous; coffee, haldi, oil wipe off easily.
2. Scratch Safe — daily chopping leaves no marks.
3. High Load Bearing — drawers support up to 60 kg each.
4. Fire Safe — does not catch fire or spread flames.
5. Water Safe — 30-day water test: wood swelled, stone unchanged.
6. Impact Safe — heavy ceramic jar drop test: stone stayed intact, stronger than granite.
7. More Storage — up to 62% more storage than standard kitchens; fits large Indian plates.

PART 2 · VERBATIM SOURCE MATERIAL (1 SECTIONS)

The sections of the master training document this module is built from — word for word, for reference and revision.

§1.5 — The 7 Safety Pillars

VERBATIM SCRIPT — use this exact wording

Always present these in order: Stain Safe — Non-porous. Coffee, haldi, oil wipe off easily. Scratch Safe — Daily chopping won't leave marks. High Load Bearing — Drawers support up to 60 kg each. Fire Safe — Stone does not catch fire or spread flames. Water Safe — 30-day water test: wood swelled, stone unchanged. Impact Safe — Heavy ceramic jar drop test: stone stayed intact. Stronger than granite. More Storage — Up to 62% more storage than standard kitchens. Fits large Indian plates.

PART 3 · VIDEO NARRATION SCRIPT (ENGLISH)

The narration for this module's video — readable now, listenable once the video is produced.

Anyone can claim their kitchen is safe. Magppie proves it — seven ways, in this exact order every time.

Stain safe: the surface is non-porous, so coffee, turmeric, oil wipe off, they don't sink in.

Scratch safe: daily chopping doesn't leave marks.

High load bearing: every drawer holds up to 60 kilograms.

Fire safe: the stone doesn't catch fire or help flames spread.

Water safe: a 30-day test — a wood panel and a stone sample, both submerged. The wood swelled and weakened. The stone came out exactly as it went in.

Impact safe: a heavy ceramic jar dropped directly onto the surface stayed intact, stronger than granite.

And more storage: up to 62% more than a standard kitchen, sized to fit large Indian plates.
