

Module 8

Process & Timeline

What happens after a layout is shared, the 3–4 month end-to-end process, site visits — and the Four Phases so Sales knows what surrounds their own stage.

Topics: process-timeline · journey-phases

Reading pack contents: module reading · video narration script

Source: the AI Bot Master Training Document + the Sales Resources master index. All content reproduced verbatim from the vetted material — unresolved source conflicts ([CONFIRM PAYMENT SPLIT], [CONFIRM YEAR], [VERIFY: Red Dot]) are flagged, never silently resolved.

Process & Timeline

After the layout is shared

1. We prepare a customised proposal and estimate from the drawings.
2. Customer reviews; once budget alignment is approved, Sales creates detailed technical drawings.
3. After confirmation, the order goes into production.
 - End-to-end: ~3–4 months from final order to installation, depending on site conditions and design complexity (fast-track may be available).
 - Site visits happen after design discussion and commercial alignment; video consultations cover the initial stage.
 - Samples: home/office delivery or an experience-centre visit — always available before deciding.
 - Assembly: factory-engineered, CNC-precision panels, pre-cut and edge-finished; fixed with specialised hardware, not just adhesives.

The Four Phases (context — Sales owns Phase 1)

Phase | Owner | Journey-map colour

1. Sales-led acquisition — BD + Sales — Coral
2. Design-led detailing — Design — Purple
3. Factory-led production — Factory — Teal
4. Aftercare — Service (SOP pending) — Grey

VIDEO NOTE (COLOSSYAN)

The Full Journey Map is explicitly flowchart-shaped in the source — build this module's video as an animated flowchart, colour-coded by phase (coral/purple/teal/grey).

[SOURCE PENDING: Full Journey Map detail]

The stage-gate detail of the Notion Full Journey Map (three stage gates across the four phases) lands here once the Notion content is pasted. Phase names and colours above come from the Sales Resources index.

PART 2 · VIDEO NARRATION SCRIPT (ENGLISH)

The narration for this module's video — the same voiceover you hear on the module page.

The customer asked: what happens after I share my layout? This module gives you the whole journey — theirs and ours.

Three steps. We prepare a customised proposal and estimate from their drawings. Once the budget aligns, Sales creates the detailed technical drawings. And on confirmation, the order enters production.

End to end, final order to installation runs about three to four months, depending on site conditions and design complexity. Site visits come after design discussion and commercial alignment.

Samples are always available. And assembly is factory-engineered: CNC-precision panels, pre-cut, edge-finished, fixed with specialised hardware — not just adhesives.

Now zoom out. The full Magppie journey runs in four phases. Phase one, sales-led acquisition — that's you, with BD. Phase two, design-led detailing. Phase three, factory-led production. Phase four, aftercare. Know what happens before and after your phase — it's how you speak about the whole company with confidence.
