

Module 9

CRM & Lead Vocabulary

Lead statuses, lead types, opportunity stages, and the shared vocabulary (DRF, Closure Form, Principally Agreed, BOQ) — awaiting the Notion source text.

SOURCE PENDING — this module is a structure-ready shell; its full content lands when the Notion source text is provided. Nothing in this pack is invented.

Topics: crm-vocabulary · lead-taxonomy

Reading pack contents: module reading · video narration script

Source: the AI Bot Master Training Document + the Sales Resources master index. All content reproduced verbatim from the vetted material — unresolved source conflicts ([CONFIRM PAYMENT SPLIT], [CONFIRM YEAR], [VERIFY: Red Dot]) are flagged, never silently resolved.

CRM & Lead Vocabulary

[SOURCE NEEDED: Notion — CRM Funnel Taxonomy + Glossary]

This module's content comes from two complete Notion pages (CRM Funnel Taxonomy; Glossary) that have not been pasted yet. To keep training accurate, nothing here is invented — the module unlocks once the source text is provided.

What this module will cover (structure ready)

- Lead statuses — the canonical list and what each means.
- Lead types and opportunity stages.
- Shared vocabulary Sales must recognise: DRF, Closure Form, Principally Agreed, BOQ (even where Design/Factory own the work).
- Why identical CRM notes matter: the same words must mean the same thing to BD, Sales, and Management.

Quiz shells for this module are built (flashcard-style matching) but held — no answer keys until the taxonomy text arrives.

PART 2 · VIDEO NARRATION SCRIPT (ENGLISH)

The narration for this module's video — the same voiceover you hear on the module page.

CRM and lead vocabulary — the shared language of BD, Sales, and Management. This module has a structure ready, and a source on the way.

Why does this module exist? Because the same words must mean the same thing to everyone. When BD, Sales, and Management write identical CRM notes, a lead never gets lost in translation.

Here is what this module will cover once its source lands: the canonical list of lead statuses and what each one means; lead types and opportunity stages; and the shared vocabulary Sales must recognise — DRF, Closure Form, Principally Agreed, BOQ — even where Design or Factory own the work.

And the honest part: the content itself comes from two Notion pages — the CRM Funnel Taxonomy and the Glossary — that have not been pasted yet. Nothing here is invented. The module, and its flashcard quiz, unlock the moment the source text arrives.
