

Module 11

Handoffs — What Sales Needs to Know

What BD validates before a lead reaches Sales, why DRF completeness matters, and the 50% handover to Design — awaiting the Notion source text.

SOURCE PENDING — this module is a structure-ready shell; its full content lands when the Notion source text is provided. Nothing in this pack is invented.

Topics: handoff-protocol

Reading pack contents: module reading · video narration script

Source: the AI Bot Master Training Document + the Sales Resources master index. All content reproduced verbatim from the vetted material — unresolved source conflicts ([CONFIRM PAYMENT SPLIT], [CONFIRM YEAR], [VERIFY: Red Dot]) are flagged, never silently resolved.

Handoffs — What Sales Needs to Know

[SOURCE NEEDED: Notion — Cross-team orientation + Sales Playbook (DRF, Closure Form)]

This module's content comes from Notion pages (Cross-team orientation; Sales Playbook — DRF, Closure Form & 50% handover) not yet pasted. Nothing here is invented — the module unlocks once the source text is provided.

What this module will cover (structure ready)

- What BD already validated before the lead reached Sales (so Sales doesn't re-do or contradict it).
- The DRF: what it contains and why its completeness decides Design's speed and accuracy.
- The Closure Form and the 50% handover: what transfers to Design at that milestone, and where Sales' involvement ends.
- The boundary: what Sales does and does not own after handover.

[CONFIRM PAYMENT SPLIT]

The "50% handover" milestone is the one point both payment-split sources agree on (50% advance). What follows it (40/10 vs 30/20) remains unresolved — see Module 6.
